BETTER BUSINESS ON 'CHANGE

Good Bank Statement Imparted Buoyancy to the Market.

Many Longs Increased Their Holdings on Saturday-Indianapolis Cereals Show More Activity.

At New York, Saturday, money on call was nominally 4 per cent., all day.

Prime mercantile paper, 8@12 per cent. Sterling exchange was dull, with actval business in bankers' bills at \$4.86@ 4.864 for demand, and \$4.82@4.824 for sixty days; posted rates, \$4.8214 @4.87. Commercial bills at \$4.81 12 @4.81 14.

Silver certificates at 74c. Bar silver closed at 72% c per ounce; Mexican dollars at 584c; at London bar silver closed at 33%d.

The good bank statement imparted a buoyancy to the dealings on the New York Stock Exchange Saturday, which sent prices up all along the line. The upward tendency continued unchecked until some time after the statement was issued, which fully equaled the expectations of the speculative fraternity. The shorts in the market began to cover at the opening, and their purchases, added to those of the longs, who saw fit to mcrease their holdings, forced quotations to a higher range with a degree of rapidity that was a surprise to conservative operators. The buying was practically all for the home account, the London purchases being trivial, and in no way can be considered a factor in the bull movement. The moving influence in the market undoubtedly was the material improvement in the financial and commercial situation, the comparatively easy money market, the gradual reawakening of confidence in commerce, and the belief that the recent decline in securities had brought into the market buyers who would hold for more than a speculative rise. The fact that considerable blocks of an investment character had been quetly absorbed and taken out of the street influenced the shorts to be more cautions and encouraged the bulls to further purchases. Illinois Central advanced 24 per cent. and Lake Erie & Western preferred 3%. In

with a very health tone. Railroad bonds were fairly active. Government bonds were steady. State bonds were dull. Closing quotations were: Four per cent. reg. 11012 Louis. & Nash... 5512 Four per ct. coup.. 11112 L. & New Albany. 1334 Pacific 6's of '95.. 101 Misseuri Pacific. 2434 Atchison. 1978 N. J. the late dealings a general reaction set in.

due to the realizing of profits by the room

traders, but the market closed firm and

LOCAL GRAIN AND PRODUCE.

Trade in Most Departments Active, with Lower Prices in Some Lines. The last day or two on the wholesale

streets and on commission row there has been considerable activity. The coming encampment is proving a bonanza for commission row merchants, where more fruits and vegetables are being handled than at any previous time since the business houses on that avenue became so numerous and cut so important a figure in the city's traffic. The bottom is out of the poultry market. Prices went off 1 cent Saturday. The demand for fruits, especially good stock, and for vegetables, is such that prices are well held. After next week it is thought lower prices will prevail. Staple groceries rule steady, and a good trade is in progress. The hide market is weak at the recently revised quotations. The provision market is steady on most descriptions of hog products. Flour is firmer at unchanged prices.

The local grain market was active the last half of the week, prices of the dif-ferent ccreals changing but little. Track bids ruled as follows:

Wheat-No. 2 red, 58e; No. 3 red, 53e; rejected by sample, 40@50c; wagon, 57c. Corn-No. 1 white, 40c; No. 2 white, 40c; No. 3 white, 3812c; No. 4 white, 30@35c; No. 2 white mixed, S842c; No. 3 white mixed, 38c; No. 4 white mixed, 30@35c; No. 2 yellow, 884c; No. 3 yellow, 38c; No. 4 yellow, 30@36c; No. 2 mixed, 384c; No. 3 mixed, 386; No. 4 mixed, 80@85c; ear corn, 43c. Oats-No. 2 white, 274 c; No. 3 white, 25e; No. 2 mixed, 254c; No. 8 mixed, 22c; rejected. 21e to 22c. Hay-Choice timothy, \$12; No. 1, \$11.75;

WHEAT SHOWS NEW STRENGTH

Firmness Without Activity Appeared in Chicago Pits Saturday.

The Leading Cereal Gained 5-8c, but a Decline in Corn Followed the Reported Heavy Increase.

CHICAGO, Sept. 2.-The improved bank statement gave strength to the markets here to-day. Firmness without activity was the general feature. Wheat gained from 1/2 to 18c. September corn dropped 14c, and May rose a small fraction. Provisions were held higher, particularly for September. Wheat opened &c@ 4c higher, and a further improvement of 4 @ sc was gained, with fair activity at the advancing scale. During the latter part of the session the feeling was not so strong and prices settled @ 4c, though the market closed with considerable steadiness. The disposition to trade was restricted by the prospective holiday here Monday. Operators are calculating on a moderate increase in the visible supply on Tuesday-possibly 250,000

The decline in corn is explained by the fact that the heavy estimates of to-day's receipts made yesterday were under the actual arrivals, which amounted to 787 cars, compared with 750 estimated. Receivers report freer deliveries from farmers in Illinois and Indiana, which rather conflicts with what was expected in view of the reports of the growing crops of those States. The cash demand was not quite up to its recent prgency. Prices were con-

fined to be range. In oats the feature was the increased offerings of September by parties who had been buying. There was no support until after prices had declined 4c for September and so for May, when the buying increased and prices railied 16@4c, but the

close was easy at 4 @ sc. Provisions gained nothing in activity from the publication of the remarkably light stocks held here. Closing prices were the highest of the day. Compared with last night September pork is up 60c, September lard .274c and September ribs 124c. More distant futures changed little. essel room in light demand and rates unchanged at 14c for wheat and 14c for corn to Buffalo, and So for corn to Kingston. Estimated receipls for Monday are: Wheat, 100 cars; corn, 710 cars; oats, 400 cars; hogs, 28,000. The leading futures ranged as fol-

DETROIT, Sept. 2.—The market was fairly active and better feeling. Wheat-No. 1 white, 614c; No. 2 red, 675c; No. 3 red, folic; October, 64 2c; December, 6840. Corn-No. 2, cash, 40c. Oats-No. 2 white, 284c; No. 2 mixed, 214c. Receipts-Wheat, 47,700 bu; corn, 5,400 bu; oats, 6,800

Dry Goods.

NEW YORK, Sept. 2 .- The improvement re cently noted for the dry-goods market has been maintained if not improved. Orders are becoming still more numerous, but the trade seems

conservative as to quantity. Cotton goods show well-sustained demand, particularly for bleached goods. Some grades, notably 6e to 6lge goods, are testing the capacity of the blencheries, the output continuing on a reduced scale. Brown shuttings are firmly held, Cotton flannels quiet and steady. Orders are of increasing magnitude, with out-of-town distributions absorbing most of the goods offered. The West and Southwest are good buyers. Staples are steady and printed flannel shows increased activity. Eusiness in print cloths at Fall River has been on a firmer basis. 10,000 pieces having been sold at an navance of 1sc, the price nov being 24c. There is some talk of a strike, which gives the cloth market an upward tendency. Dress and woolen goods are moderately active, with an improving jobbing demand with the navy blue goods somewhat scarce and particularly wanted.

CHARLESTON, Sept. 2.-Turnentine firm at 231g # 24c. Rosin quiet and firm at 80c for good SAVANNAH, Sopt. 2 -Spirits of tarpentine 25e bid. Rosin firm at 90c.

220 bales; gross receipts, 530 bales; exports to the continent, 900 bales; sales, 200 bales; stock, 33,737 bales.

Metais. NEW YORK, Sept. 2 .- Pig iron dull. Copper firmer; lake, 9.65c. Lead strong; domestic, 3.62 c. Tin strong: Straits, 19.40c; spelter quiet; domestie, 3.55c.

ST. LOUIS, Sept. 2 .- There is no change to note in prices and no sales reported, but there seems to be a more hopeful feeling for the future.

LIVE STOCK.

market. FED THROUGH A FUNNEL.

With a Hole in His Stomse's He Has No Use for an Esophagus. Philadelphia Press. Samuel Stringer will in a few days leave

the Jefferson Hospital, of this city, for his home in Niles, O. He has been the subject of a most wonderful surgical operation, the only one of its kind ever performed in the United States. Mr. Stringer to a married man, forty-eight years old, and has been engaged for some

years by one of the mining companies of Ohio. About a year and a half ago a cancerous growth made its appearance in his throat in the region of the esophagus, and in a short time closed the opening to such an extent that he found it impossible to pass solid food of any kind. The physicians in charge advised the use of liquid food as the only means of suste-

nance, and for thirteen months Stringer lived on beef broth, milk, soups, coffee and soft boiled eggs, but the malady increased and the growth finally closed up the aperture entirely, and for days he was unable to partake of any form of nourishment. Death by starvation was staring him in the face when he decided to place himself in the hands of one of the surgeons of one of the institutions of this city. He selected Jefferson Hospital, and arrived there on the 81st of July of this year, a mere shadow of

his former self. An operation was at once decided upon, and after being etherized an incision was made from the middle of the abdomen clear through the walls, exposing the stomach, which was withdrawn from its cavity and a small opening made into it. Through the opening a rubber tube was inserted, the parts were then carefully put bark into position and stayed, and the day after by means of a funnel, some beef tea and warm milk were poured into the stomach for the first time. This way of feeding the patient has been regularly kept up for the past three weeks, and soups, milk sop, softboiled eggs, oatmeal and other liquid food is administered three times a day and oftener if Stringer feels hungry.

He has entirely recovered his health, and is able to walk about, and will leave for his home in Ohio in a few days. For the present he must feed himself through the rubber tube by means of a tunnel, which duil; No. 2, 52c. Hay steady at \$14@15. he keeps in a small case in his pocket, but after some months, when the aperture and passage becomes defined, the rubber tube will be taken out, and the opening will then be permanent, requiring only the use

of the funnel. The operation is in every way a successful one, and Stringer will be able to live the balance of his days without swallowing a particle of nourishment.

Cribbing Corn.

Farmers' Home Journal. As the season for gathering corn approaches, it is very timely to say a word about cribbing it. It is usually considered a saving to crib

corn in the shuck, as the shuck is considered a preventive from the raids of weevils and rats, besides the shuck keeps the grain cleaner and nicer. The corn can then be shucked on rainy days or when the farmer can do nothing else. Every farmer should have a rat-proof crib, one removed from other buildings, trees, etc., and set on pillars three feet

high with inverted tin or sheet-iron pans

on their top as a cap. If a ladder is used

in place of steps, and always taken down when not in use, and, if nothing is leaned up against the crib, not a rat or even a mouse will get into such a crib, unless carried in old sacks or baskets. It is such an easy matter to have such a crib, we are surprised that one is not found on every farm in the country. For the protection of the corn against weevil and other insects it is a good plan to put some bisulphide of carbon lone ounce) here and there in the crib of corn as

it is put in. A layer of bisulphide should

be placed for every layer of corn three feet

deep. In using the bisulphide be sure to have no fire about the crib-net even a In ten days the bisulphide will all have escaped and there will be no increased danger from fire. The very unpleasant odor will soon be gone, and not the slightest injury will have been done the corn. Nothing more destructive to insects can be used than the bisulphide, and its use should be

There is nothing that makes so much difference between ordinary and delicate cooking as a set of strainers. It is important to own a collection. There should be one of very fine wire for sifting sods. spices, etc., and for straining custards and jellies. There should be others with meshes from one-sixteenth to one-eighth of an meh

extended.

THE NEW TAX LAW.

Hop. Jo ish Gwin Admits that It Enables Corporations to Escape Burdens.

New Albany Public Press (H.n. Josiah Gwin, Ed-During recent political campaigns in this State the Indianapolis Journal and nearly all the lesser light Republican newspapers of Indiana diligently and vehemently charged that under the workings of the new Democratic tax law the farmer and land owner would be taxed more than any other class of taxpayers; that railroads, banks and corporations would be taxed lightly and at the expense of the farmer and land

The Public Press and Democratic papers in the State, in good faith, made a general denial of the charges, and did all in their power to counteract what they then believed to be electioneering clap-trap to deceive the people. The spirit and intention of the new tax

law was and is that all classes of property in the State be taxed equally and alikethat is, at its actual cash value. For many years before the enactment of this law railroads, banks and corporations had practically escaped taxation, and consequently the burden fell heavily and unjustly upon the farmer and land owner. The result of the forty days' proceedings of the State Board of Tax Commissioners,

increased about an average of 40 per cent., that value to stand four years, while railroad assessments made annually were increased from \$69,000,000 to \$160,809,575. Banks and other corporations were assessed at what was supposed to be their actual values.

beginning Aug. 1, 1891, showed that the

values of lots and lands of the State were

That was the first time in the history of the State that corporate property was taxed equally with real estate. Every year since there has been a howl from organized capital, asking large and unjust reductions, while the patient and unsophisticated farmer, with commendable regularity, marches to the treasurer's office and pays his taxes without murmur or com-

The large reductions made in values of railroad property by the late meeting of the State Board of Tax Commissioners proves conclusively that the Indianapolis Journal and the Republican press of the State during the late campaigns told the truth, and, therefore, Democrats have been basely deceived by a counterfielt farmer Governor and his tax board, composed of a retired banker and corporation manager and Democratic State officers who seem to have forgotton Democratic pleages.

The total assessment as it now is, is in round numbers, less than \$159,000,000. It shows a reduction of more than \$1,500,000 from that of 1891. This reduction is found in spite of the addition of \$1,901,872 valuation on a new line, the Montpelier & Chi-

cago railroad. Remember, reader, that the assessment of real estate made in 1891 is to stand until 1895, and cannot be changed. Comparatively no complaints or petitions for reductions were made then or have been made since by farmers and real estate owners. On the other hand, bank, railroad and corporation assessments have willingly been made by practically a Democratic Board of Tax Commissioners. Two or three in-stances will be sufficient to cite at this The Belt railroad at Indianapolis was re-

duced \$25,000 per mile on main track and on rolling stock \$500 per mile, making a to-tal decrease of about \$250,000. The Indianapolls Union railway was reduced \$500,000 per mile! Thus it will be seen that railroad managers and manipulators understand how to work a willing State Board of Tax Commissioners. Two railroads get a reduction of about three quarters of a million dollars on valuation, while the poor farmer and real-estate owner is unable to get a cent's decrease. Indianapolis town lots and Marion county farming lands were taxed at fully 10 per cent, more than their value, but those assessments must stand until 1895 before they can possibly be reduced, the Tax Commissioners refusing to lower the assessment. But let us bring the matter nearer home. Last year the New Albany Highland railroad was assessed at \$20,000 per mile for

main track, \$20,000 for second main track. \$3,700 improvements on right of way, and rolling stock at \$4,800 per mile. The total assessment being \$54.076. This year the assessment of this road was reduced to \$10,000 per mile on main track, \$10,000 per mile on second main track and \$1,500 per mile on rolling stock, making a total reduction of over \$27,000. Besides, this road has added a "dummy" engine to the rolling stock at a cost of about \$3,000, making the reduction, even on

a little road, of over \$30,000. And this reduction was made in the face of the fact that the attorney for the Highland road, in his argument before the board, stated that the cost of the road was \$63,000, not including the right of way, which alone is worth more than the assessment of the entire concern as made by the tax commissioners.

On the other hand, the assessment of real estate in this county and city stands as made in 1891, not a cent's reduction being made. Many instances can be pointed out where real estate in this city has been assessed at double 1ts value, thus showing that the owners of lots and land pay the

The Public Press, therefore, pleads guilty to having been mistaken in attempting to defend the "Democratio" tax law and those sworn to enforce it, and unwillingly, but honestly, acknowledges that the Indianaptold the truth when they declared that the land of the State would be unjustly taxed. while railroads, banks and corporations would escape their just burdens.

COINERS HARD AT WORK Gold Pieces Being Turned Out at the Mint

in Great Numbers. Phliadelphia Record. In order to place its gold bullion in circulation and relieve the stringency in ourrency, the government has begun turning its reserve bullion into coin. Secretary Carlisle has ordered the mints here and in San Francisco to turn out the money to their fullest capacity. The Philadelphia mint is expected to turn out \$5,000,000 in gold per month, and as much more as possible. This is now being done, the amounts being divided so as to turn out \$2,500,000 in ten-dollar pieces, nearly as much in fivedollar pieces, and the balance in two-and-

one-half-dollar pieces. Superintendent Bosbyshell said, last night, that the mint is being worked night and day to do the work. The adjusters are working until 8 o'clock, and the rollers until 10 o'clock P. M. In this way the Superintendent expects to exceed the \$5,000,-000 monthly issue. He does not know how long the work will continue, but there is enough gold bullion in the vaults of the mint to keep up that output for three months-from \$15,000,000 to \$18,000,000. Although the output now is nearly double the ordinary output, were there a new mint it could be twice as much again. No time is wasted, however, and in between times the mint is running off monthly \$150,000 in silver balf dollars, \$150,000 in quarters and nearly \$100,000 in ten-cent pieces, in addition to the regular output of five-cent pleces

and pernies. As fast as the gold pieces are coined they are sent to the various subtreasuries. which are paying all checks and warrants in coin. The government has from \$85,000,-000 to \$90,000,000 of gold bullion, a large proportion of which will probably have to be coined here, as most of it is in the East

INDIANAPOLIS

DAILY.

SUNDAY

AND

WEEKLY

The Journal's price for daily is only 15 cents a week, and it has a very wide circulation, reaching a large number of people hitherto unable to afford the luxury of a first-class daily paper. Reports from agents and subscribers indicate a continued increase, and that what used to be regarded as a luxury has become a necessity. The new readers not only remain, but they are constantly increasing.

It is the purpose of the Journal to make itself even more indispensable to its patrons, new and old, and to still further widen its field. To this end it will not only endeavor to maintain the characteristics which have established its reputation as by far the best newspaper in Indiana, but will add such new features and improvements from time to time as are in accord with journalistic progress and that may tend to the advantage of its readers. It will, for example, give increased attention to State and local interests. What Indianians want is a paper in which Indiana affairs are given especial prominence and importance. This want the Journal has always supplied as no other paper pub . ished outside or inside the State is able to do; but the rapidly developing industries and business and social enterprises of the community call for additional consideration and space, With this in view its corps of correspondents has been increased until ithas a representative in nearly every town in the State Special traveling correspondents will visit the news centers of the State at frequent intervals, thus insuring the "write up" of every important event or matter of general interest.

Being published in the geographical center of Indiana the Journal is afforded unusual facilities for securing news promptly, and, what is of greater consequence, is able to reach its subscribere without delay. The ruuning of morning trains from Indianapolis is very favorable to the early distribution of papers sent by mail or express, and in most towns within a radius of a hundred miles Journals are delivered as early as in the city where they are printed. In the more remote counties there is but little loss of time in trans-

portation. The Journal is the paper for Indianians and particularly for Indiana Republicans. The change of administration involves the settlement of political problems likely to be of the most direct personal concern to every farmer and business man in the State. All such matters will be set forth in detail, the Journal's Washington correspondent being instructed to give especial attention to every hing having

a possible bearing on Indiana interests. But though the Journal is Republican in politics it is non-partisan in the publication of news. Its constantendeaves is to secure facts unbiased by prejudice and to make its columns truste worthy records of each day's happenings A large editorial force supplements the work of the press associations and the correspondents, and furnishes careful

supervision for each department. The Sunday Journal has a well-established literary character, superior to that of any Western paper. It is not defaced by "plate matter" nor filled with a heterogeneous mass of syndicate literature, but its contributions and miscellany are chosen with a view to their special fitness and adaptability to the tastes of the readers. The reading matter in any given number of the Sunday Journal is equal in quantity and it not inferior in quality to that found in the leading magazines. As an educational adjunct and a source of entertainment the Sunday Journal is indispens-

able in every well-regulated family. The Weekly Journal, at \$1 per year, contains more reading matter than can be obtained for the money in any other shape. It is carefully edited and offers the news of the week in condensed shape and a variety of miscellany, agricultural and household literature that render it one of the best investments that any family can make. Tre it and see. It has a large circulation in this and other States and agents find it an easy matter to secure large lists of subscribers. Special inducements offered to agents. Circulars sent on appli-
